

RJ Working  
Restorative Approaches to Harm

# RJ WORKING YOUTH CLIMATE ACTION OFFER

Our Youth Climate Action Offer for schools includes the following, and we are happy to discuss any of these options if you would like to take them forward in your school:

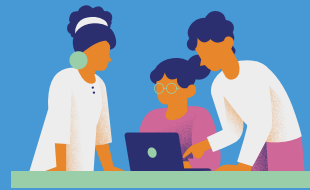

## Assemblies

Our assemblies engage students with key climate issues and to inspire them to lead campaigns within their school community.

## Climate Action Consultation

We consult your entire student body using our tailored climate survey, and provide you a report of the findings, so that your sustainability work is truly led by students.

## Podcast

We work with students to record their own episode of the EcoPod podcast, as a platform for student voice to be heard and to build connections between schools.

## Twilight Staff Training

This 2 hour workshop supports your whole staff team to explore together how to embed environmental learning and action into the culture of your school community.

## Campaign Training

We work with Eco Groups to train them in running their own environmental campaign, supporting teamwork, leadership and active citizenship.

## Green Ripple Effect

This 2 day programme for 12 students involves learning about Restorative Practice through nature connection, equipping students to become leaders and supporting their involvement in school decision making.

## Green Careers Workshop

This half day workshop, suitable for years 9-11, is a creative and interactive way for students to consider their life and career choices to build a sustainable future.
